# About the School of Computer Science and Engineering

The School of Computer Science and Engineering (SoCSE) focuses on making students ready for the future global careers through strong CS foundation with hands-on skills, specializations in disruptive technologies and 21<sup>st</sup> century skills such as problem-solving, critical thinking, communication, innovation, creativity, and entrepreneurship. This is achieved through project-based learning, international internships, interdisciplinary skills through various minors, community-based learning and focus on portfolio building and mentoring for leadership through learner analytics.

## Design your own curriculum

### FROM THE DEAN'S DESK

**Dr. Shobha G.**

Dean, School of Computer Science and Engineering

The School of Computer Science and Engineering (SoCSE) is dedicated to providing comprehensive programmes that equip students with essential 21<sup>st</sup>-century skills, including learning, literacy, and life skills. The curriculum is carefully designed to prioritise fundamental concepts while incorporating advanced topics, ensuring that students develop a strong foundation upon which they can build their knowledge and expertise.

Our School emphasises on fundamental concepts, encourages research and innovation, offers minors from other schools, provides specialisations in allied fields of Computer Science with research centres, and fosters a vibrant range of student led student clubs preparing students to become leaders and innovators in the rapidly evolving field of Computer Science. Graduates emerge with a well-rounded education, practical experience, and a strong foundation for success in today's interdisciplinary workforce.
